Kane Group are an established, and successful multi-disciplinary building-services solution contractor, with our Head Office based in Banbridge, Northern Ireland.

We're an innovative, forward-thinking company with continued steady growth serving residential, hospitality, education, commercial and healthcare sectors with offices in Northern Ireland, London, Birmingham, Glasgow and the Republic of Ireland.

We are actively seeking a Commissioning Manager to manage the commissioning processes across domestic & commercial projects.

Key Responsibilities

Take overall responsibility for the day to day management of all M&E commissioning activities on the project/projects, to ensure successful completion of these activities against the programme

Management of the specialist subcontractors

Regular reporting and meeting attendance, where you are computer literate

Dealing with the client and its representative in a professional and positive manner and represent the company in a best practice setting

Review/approve concise commissioning method statements

Witness on site testing and report on findings

Review and comment on quality of M&E install during the installation phase

Interface with the utility companies

Management of water treatment

Review and comment on design of services in association with the specific discipline

To maintain positive relationships with other staff and professional team members, along with your line manager

Managing the trade contractors' obligations to commission and manage the delivery of the specific services, in association with our scope of works

Co-ordination, integration, and management of commission/testing
